Year 7 KEP Community Presentation

On Friday 25 November, the Year 7 Students delivered the final component of the Kilcoy Environmental Project when they presented their findings and project displays to the community at the Kilcoy Information Centre. The project presentations were based around communicating awareness to the community about “What’s in our Water”. We began this exciting new initiative for our Year 7 students this term. The Kilcoy project combined the curriculum of science and humanities into one unit designed to provide opportunities for students to come together as a group to develop their collaboration skills, whilst still providing individual class group work with a focus on developing their science data skills and the communication aspect of humanities.

The unit provided opportunities for students to interact with outside organisations locally such as SEQ Water and included excursions to Wivenhoe Dam, and local creek water quality testing reinforced the in-class learning.

Students are to be congratulated on the high standard of their final presentations and commended on their enthusiasm and knowledge of the subject. This combined science/humanities project was an outstanding example of Kilcoy State High School’s commitment to providing quality learning opportunities to its students.
Science Department News

Year 8 Students have been studying Biology this term and investigating cells, their structure and function.

Students completed a range of projects that involved designing models or reports that showed understanding of the scientific knowledge and evidence learnt throughout the unit to examine plant cell specialisation and the development of our modern understanding of the cell.

The year 9s have been studying chemistry this term and were learning about titration. They carried out a titration to determine the amount of hydrochloric acid that 3 different antacid tablets could neutralise.

A titration is a chemical technique that requires quite a bit of skill.

Students use the technique in senior chemistry to determine molarity or concentration of chemicals.

It requires the use of a chemical indicator that changes colour once the end point (neutralisation) has been reached.

They all did really well and used the equipment with a high degree of accuracy and skill.
Happy end of term!
In just a few short days, we return your kids to you to rest and recharge ready for a hard working 2017.
Have a wonderful holiday and we will see you all back in full correct formal uniform on Monday 23 January 2017.

Lindy Craddy,
Junior Secondary Deputy Principal

Developing Leadership Values
Our 2017 leaders were invited to attend the Halogen Foundation National Young Leaders Day at the Brisbane Convention Centre.

The National Young Leaders Day is an annual event founded in 1997 to develop strong leadership values amongst young Australians.

The Program consists of keynote talks, multimedia presentations and interactive learning that seek a range of specific outcomes for young people who aspire to lead themselves and others well.

The Halogen Foundation gathers together prominent leaders from all walk of life to be a part of this day.

The program is designed to benefit any student who shows an interest in developing their leadership potential.

Our students reported that the event was a fantastic experience.
Kindergarten Visit

Our Agricultural department was host to a visit from the students of C&K Kindergarten on Monday. The children were given a tour of our farm produce where they learnt how to tell when corn is ready to pick, and how big zucchini get if you forget to pick them in time.

The carrot picking was very popular and all students were able to take their very impressive carrots home.

The year 10 students assisted with a petting session with our bigger chickens and the goats, before the children were shown a feeding session of our native fish.

In what was great timing, two of our incubator eggs hatched that morning, so they were able to see what a chicken looks like when it has just hatched.

Being able to provide this opportunity to the local children is one of the great advantages that our school has, and is part of the close community connection that Kilcoy State High School prides itself on.

New Chaplain for 2017
Kate Gold has been appointed as the Chaplain for KSHS for 2017.

Kate is currently the Chaplain at the Primary School and will be spending two days at each school next year.

We welcome Kate to our school.

Timetable for Last Week of School

Monday December 5: is a normal timetable day (Includes the Year 7 Transition day)

Tuesday and Wednesday: Pastoral Care days with a variety of guest speakers, events and activities planned

Thursday: Rewards Beach Day trip and alternate program for those not attending

Tuckshop: Monday normal, Tues-Thurs hot food is pre-order only
Closed Friday
From the Junior Secondary Deputy Principal

Student Absence Hotline

Parents/caregivers please note all student absences must be explained either by telephone or signed letter (This includes late arrivals & early departures)
PEPAR Stars

Amanda Mills and Sophie Wolf are the PEPAR Stars for November.

Amanda was selected to be the Qld representative of the Australian Team who competed in the 2016 International Mounted Games at Whittlesea in Victoria.

This was the second time that the Australian Team has won, narrowly defeating the team from the UK. Other countries were USA and Canada.

All riders in the event rode borrowed horses rotated each round. Performing at the elite level on an unfamiliar horse is a fantastic achievement for these riders under 16 years old.

Riders also experienced highlights of Victoria - bushwalking in the Grampians, canoeing, a cruise on the Yarra, visits to Phillip Island, Healesville Sanctuary, the Darley stud operation at Northwood Park, Seymour, and Pony Clubs at Stawell and Yarrambat. Congratulations Amanda.

Sophie was recognised for recently competing in the All Schools Triathlon Championships at Kawana, where she placed first for the Sunshine Coast region and 13th overall.
